To the Residents of the Lake Pointe Community

Re: Vehicular Access to District Preserve

The WTCMUD No. 5 directors would like to take this opportunity to thank the Lake Pointe community for its recent attention to and respectful use of the Preserve and dock areas near Lake Austin. Since last summer's temporary gate closure, we have observed a notable decrease in trash, graffiti, misuse, and complaints regarding the Preserve.

We would also like to thank the members of the Lakeside Committee for their time and effort in presenting their September 3, 2014 letter of recommendations, which outlined the culmination of community input on alternative security measures. The recommendation letter listed 10+/- potential ideas that serve as next steps for the District to consider implementing should issues arise in the future related to access, maintenance, and security for this area.

With continued attention and respectful use of the Preserve, we feel confident that the District will not have to close the gate this summer.

Sincerely,

Larry Fox, President
